

How to Create Prosperity through Home Improvements

Whether you rent, lease or own, any interruption in the flow of positive energy in your home and personal surroundings can cause many tiny interruptions in the flow of prosperity in your life. Your life, home and surroundings are filled with a constant flow of energy that can be positive, helpful and supportive, or negative, obstructive and act as a barrier to your prosperity. It is the flow of positive energy that helps keep your life moving forward smoothly, filled with an upbeat attitude, hope and prosperity.

When your personal environment does not work properly, it needs to be refurbished, repaired or replaced in order to provide you supportive and prosperous energy. Things that should be working properly but are in disrepair, cluttered, dirty or broken, provide an interrupted flow or completely stop the flow of prosperity energy throughout your surroundings.

This type of broken or missing energy flow affects you the same way a power outage affects your home. Without electricity, you are unable to run appliances, heating or cooling equipment, use computers, watch the television, take a shower or wash clothes. Without a flow of positive energy in your home and surroundings, little or even big things go wrong, and you can become discouraged, depressed and disengaged from family and friends.

Refurbish, Repair or Replace to Encourage Prosperity

Whether your home needs a minor facelift like painting rooms and replacing tattered rugs and accessories - or fixing nuisance type repairs and annoyances like dripping faucets, do not hesitate one minute longer. Eliminate the negative energy in your surroundings and make room for prosperity energy to flow throughout. In Feng Shui, the rule of thumb is "if it's broken, fix it, if you can't or don't fix it, get rid of it".

The little things in your life do matter. It's not only what you think, say and do that matters but also what you surround yourself with on a daily basis. Think like a realtor would if evaluating your home for a prospective homebuyer, inspect your home and belongings from top to bottom and inside out. The following points will help you eliminate any blocked negative energy and create a new flow of prosperity energy.

- Eliminate clutter throughout your home, especially at the front door, in the bedroom, kitchen and living room
- Make sure the prosperity generating areas in each room are totally clutter free:
 - East - new everything energy
 - Southeast - wealth
 - South - good luck
 - West - creativity and gold for money
 - Northwest - helpful people

- To liven up the energy in a room paint it a fresh new color - keep the colors peaceful and calm if stress is an issue, make them a bit brighter to overcome discouragement
- Add a spark of new energy by using accessories in brighter colors such as pillows, artwork, silk or fresh flowers and area rug
- Place live fresh green upward reaching plants or indoor trees in the east and southeast - keep them healthy and replace them immediately if they are not prospering - quality silk will also work
- Place a mini or tabletop waterfall or aquarium in the north area of your living room so prosperity can flow in
- If a stairway by your front door sends prosperity energy flowing right back out of your front door, place a round rug at the bottom of the stairway to send the energy circling back into your home instead of out the door - no room for a rug, hang a 35 mm multi-faceted round crystal from the ceiling halfway between the foot of the stairs and the front door to do the same thing
- Keep doors to all rooms along hallways open so prosperity energy can flow throughout each room - a closed door prevents the entry of prosperity energy
- If a room or a specific corner of a room is always dark, add lamps or floor lighting to energize those areas - put them on timers so they are consistently on at least two hours each day
- Add a bowl of fruit - fresh or quality faux fruit will work - place it on your dining table or kitchen counter, whichever is nearer the center of your home to energize abundance

Design the flow of prosperity energy throughout your home and personal environment so that prosperity is not only encouraged to enter but will flow freely and abundantly throughout your home and the life of each person living in the home.
